

Monrovia, Liberia

2019 - Liberia Gov't Endorses New Approach to Cut Downs Costs on Road Construction.

14 Military Hospital Road
Shufflein, Margibbi County.

The Ministry of Public Works and the Embassy of Sweden have endorsed the construction of Smart Materials from Polyroads in the country, saying it is an effort in support of the governments' Pro-poor Agenda for Prosperity and Development (PAPD).

"The Polyroad costs US\$424 000 per Km instead of the regular \$1 to 1.2 million normally spent for a Km of asphalt road or concert pavement."

Ass. Public Works Minister for Operations –
Kaustella Kialain

The application is simple and cost effective;

- Insitu materials were used construction of the base and sub-base layers
- The base-layer was stabilized with SoilTech Mk. III, third generation stabilizer from Polyroads
- The road was then sealed with a 30mm Ultra-thin polymer modified asphalt friction seal – AsphaltTech Smart Material

- Internationally Agrément Certified
- 10 Year Warranty with maintenance contract
- SMART MATERIALS
 - Internationally certified - WFTAO
 - Use insitu materials
 - Stronger roads
 - Quicker construction
 - Cost effective
 - Job creation
