Le Directeur General

A Monsieur le Directeur General  
POLYROADS CONGO sari  
a KINSHASA / NGALIEMA

**Concerning: Rapport Concerning Certification**  
**- Soil Stabilisation Products**  
**- Bitumen Emulsion Polymers**

Monsieur,

We have the pleasure to advise you that the Committee of the General Directorate for Roads Agency has certified the following products, based on the technical procedures indicated;

- **AsphaltTech** - The cold dense coatings formulations with a 0/8 emulsions bitumen/polymer namely, ASPHALTECH, be used in layers with a minimum thickness of three centimeters for **national and secondary roads**
- **SoilTech Stabilizer** for roads - base-layer road material's consisting of clay and loamy sands, must be stabilized with SoilTech polymer to a depth of fifteen centimeters for secondary and agricultural feeder roads

With highest regards from the Director General.

MUTIMA SAKRINI Herman, Ing.Civ

Cc : Directeur Représentant Polyroads Congo.

En effet, Monsieur le Directeur Général, il se dégage de ce rapport les conclusions suivantes :

---

**Notes From the Certification Committee:**

3.15 The Committee has certified the use of SoilTech for stabilizing base-layer materials which has a ground P.I <5.6 %, for T1 and T2 traffic (T <1000 vehicles / day) because the stabilization of these material with SoilTech will result in a CBR <80%, which meets the minimum recommended base-layer requirements for these types of traffic.

SoilTech can be used for stabilization in the base-layer of secondary and agricultural roads with a mandatory wearing course seal of 3cm Asphalttech

3.16. The Committee recommends using Asphalttech as a wearing course for pavement sealing where traffic does not exceed 1000 vehicles / day.

Started at 11 H 45 ', la meeting has ended 13 H 45'
