

G.M.R HYDERBAD AVIATION SEZ
Hyderabad - India

SAFRAN

SAFRAN – Jet engine manufacturer is a primary tenant at G.M.R industrial park

World federation of Technical Assessment Organisations

- SoilTech Mk. III Binder - Internationally Agrément Certified
- SoilTech Mk. III is the only international binder with WFTAO certification

SMART MATERIALS

- Uses insitu materials
- Stronger roads
- More longevity
- Quicker construction
- Cost effective
- Enviro friendly
- Reduced CO2 by 98%

2021 – G.M.R Group Chooses third generation SoilTech Mk. III polymer stabilizers for the 15 000 m2 Hyderabad Aviation Park roads.

- SoilTech Mk. III polymer stabilizers were used for the first time by G.M.R at their Warora power plant, for the roads and parking areas in 2016
- Since 2016 zero maintenance has been required or done on the Warora SoilTech Mk. III roads.
- G.M.R once again chose SoilTech Mk. III for the state-of-the-art aviation industrial plant in Hyderabad.
- 13 000 m2 of road completed 45 days
- Insitu Base-layer material stabilized with SoilTech Mk. III polymer to a depth of 150mm using 1.5 litres SoilTech /m2
 - Stabilized area was used by construction trucks for 30 days prior to sealing with wearing course
- 100mm WMM layer was placed over the stabilized layer
- Wearing course – 40mm bituminous concrete
