

DUST-TECH

WHY DUST-TECH?

Dust-Tech polymer is a transparent liquid plastic with a particle size of 10 micron.

Dust-Tech is mixed with water and applied over the allocated area where dust is most prevalent. Once cured the polymer dust suppressant will bind and seal the top 5 to 30mm of the material.

Dust-Tech is a multi-purpose product that can be applied to haul roads, tailings, fly-ash stock piles and rural roads.

BENEFITS OF DUST-TECH:

- Wind and water resistant
- Cost effective
- Reduced water consumption up to 63%
- Performance warranty from 3 to 12 months
- Environmentally friendly
- Multi-purpose application
- Reduced maintenance up to 41%
- Material can be recycled

ISO 9001 & 14001

Colorants can be added

Free material testing

No-cost site inspection and quotation
