

POLYSEAL waterproofing

WHY POLYSEAL WATERPROOFING?

PolySeal is a polymer composite consisting of cross-linking polymers, which is mixed as an admixture with cement and used for waterproofing.

PolySeal can be used to repair new or existing roofs such as tile, IRB, concrete, wood and steal roofs.

PolySeal Waterproofing is a high-tech, cost effective and easy to apply, spray-on or paint-on waterproofing sealant. The application of three coats of PolySeal emulsion will result in a highly elastic, non-toxic and flexible waterproofing seal.

BENEFITS OF POLYSEAL:

- UV Resistant
- Cost effective
- Can be used on tile, concrete, wood, IRB and steel roofs
- Seamless
- Environmentally friendly
- 10-year Warranty
- Spray-on or paint-on application
- Boundary Walls

ISO 9001 & 14001
